

(4)

$$y' = (e^{-x} \sin x)' = e^{-x}(\cos x - \sin x)$$

$e^{-x}(\cos x - \sin x) = 0 (0 \leq x \leq 2\pi)$  を解くと

$$x = \frac{\pi}{4}, \frac{5\pi}{4}$$

増減表を書くと次のようになる .

$x$	0	$\dots$	$\frac{\pi}{4}$	$\dots$	$\frac{5\pi}{4}$	$\dots$	$2\pi$
$y'$	+	+	0	-	0	+	+
$y$	0	$\nearrow$	$\frac{1}{\sqrt{2}e^{\pi/4}}$	$\searrow$	$-\frac{1}{\sqrt{2}e^{5\pi/4}}$	$\nearrow$	0

増減表より，極大値  $\frac{1}{\sqrt{2}e^{\pi/4}}(x = \frac{\pi}{4})$

極小値  $-\frac{1}{\sqrt{2}e^{5\pi/4}}(x = \frac{5\pi}{4})$
